Special Assessment :

- Color Vision Screening
- Eye Pressure (IOP) Measurement

advanced eye test

by professional optometrist

“ i almost went blind ”

“ last month, I began to notice subtle changes in my vision and thought it was time to change my glasses. I visited OptiSaver, expecting to simply buy a new pair. There, Ivan, the optometrist, offered me a comprehensive eye exam as part of their advanced services. To my surprise, Ivan discovered early signs of glaucoma during the exam. Thanks to his expertise and the state-of-the-art testing at OptiSaver, I received prompt treatment. This early detection saved my sight, and I am incredibly grateful for their care and dedication. OptiSaver truly does more than just provide glasses—they make a real difference in people's lives. ”

why us?

“ KireiKōsen Japan Lenses:

aspheric design with Anti-UV & Anti-Blue Ray protection, featuring Super Hydrophobic Multicoating for water & dust repellence, anti-smudge, & anti-glare properties. Enhanced with CPT for impact and scratch protection, with optional Sun-changeable features.

”

“ Designer Titanium Frames:

discover the Japanese Designer Titanium Frame, an **ultra-light, durable, and flexible** eyewear option. Crafted from high-grade titanium, it offers all-day comfort and long-lasting use. **Hypoallergenic** and **stylish**, this frame combines Japanese design with advanced material technology for exceptional comfort and durability.

”

“goodbye migraines: how OptiSaver fixed my glasses”

“ OptiSaver corrected my eyeglass, which ended years of constant migraines and headaches. My migraines were due to the misalignment of my lens focal point caused by a bent frame. This consistent strain on my eye muscles led to frequent migraine attacks. When Boon Ping, the optician at OptiSaver, realigned my old glasses frame and focal point, I immediately felt the difference. Two weeks later, I returned to OptiSaver for a new pair of glasses. The right lenses made a significant impact on my life, and I am grateful for their expert care. ”

what is Multifocal?

A **multifocal lens** is a special type of lens that is designed with multiple zones, each with different power prescriptions. These lenses allow people to see clearly at various distances - up close for reading, mid-range for computer work, and far away for driving, without the hassle to switch between different pairs of glasses.

why **OptiSaver KireiKōsen PPS Multifocal** so different?

Conventional
Progressive

Free-Form
Progressive

RM
605
nett

our Multifocal have **wider visual field** and **less peripheral distortion**. It helps you to see more than the usual progressive lenses. **In OptiSaver**, we make **personalized progressive lenses** for our customers and we ensure our customer will have **best optical quality**.

The image features two men in green medical scrubs, smiling and wearing glasses. They are positioned in front of a large green sign that reads "OptiSaver" in white text. The man on the left has short dark hair and is wearing clear-rimmed glasses. The man on the right has short dark hair and is wearing dark-rimmed glasses. The background shows a modern interior with a sign that says "66 STEPS TO THE RIGHT".

who are WE?

OptiSaver was born from a father quest for quality glasses at fair prices for his daughter. Frustrated by the lack of transparency in the eyewear market, he envisioned a change. Optisaver's mission is simple: to provide high quality eyewear and professional eye care at clear prices. His dedication to value led him to streamline the supply chain, cutting unnecessary costs. With direct factory sourcing and minimalist store designs, Optisaver offers quality and affordability. Emphasizing the importance of optometrists, they ensure proper eye checks for tailored solutions. Guided by this vision, Optisaver has transformed the industry, making quality eyewear and eye care accessible to all.
