single vision + designer frame

SATOSHI MORI
Designer Frame +
KireiKōsen Lenses
1.6/1.67 index MR-8/7

An optometrist in a green uniform is examining a pair of glasses. He is wearing a lanyard that says "FOR A HEALTHY & VIBRANT WORLD" and "Alpro group". The patient is a woman wearing a black hijab. The background is a blurred office setting.

our **core values**

At OptiSaver, **professional eye care** is at the heart of what we do. Our certified optometrists deliver accurate, trustworthy services to protect and support your vision. We provide **stylish yet affordable** options, offering frames that combine fashion and comfort, with clear, fixed pricing starting from RM305. With **transparent pricing**, you'll always know exactly what you're paying for, with no hidden fees, no surprises. Through our **community outreach**, we extend quality eye care to underserved areas, because everyone deserves clear and healthy vision.

“ the day a simple eye check saved my sight ”

I walked into OptiSaver that day because my eyes were red, painful, teary, and extremely sensitive to light. Initially, I thought it was just a minor irritation and went in for a simple eye check. To my surprise, the optometrist detected a serious condition — a corneal ulcer — that could have cost me my eyesight if left untreated. Thanks to their attentiveness and professionalism, I was able to begin treatment immediately and avoid permanent vision loss. What I assumed would be a routine check turned out to be a sight-saving experience, and for that, I am truly grateful to the dedicated team at OptiSaver.

— Cheryl Ng, Seremban

Model: RUGG

Strong lines, rich acetate tones, and timeless silhouettes. These frames are designed to add character to your look. The green brings a fresh, confident edge, while the dark tortoiseshell reflects quiet sophistication. Worn with ease, they frame your face with balance and clarity, making every expression feel composed and refined. These are glasses that do more than correct vision. They define your presence.

amblyopia (lazy eye) in Malaysian children

around 7.5% of Malaysian pre-schoolers are affected by amblyopia, with most cases involving both eyes. The leading cause is anisometropia (unequal eye power), making up 25% of cases. Early screening and treatment, ideally before age 8, are key to preventing long-term vision problems and supporting healthy development. (Source: e-MJM, Malaysian Medical Journal & UCSI University Study)

what is multifocal?

a **multifocal lens** is a special type of lens that is designed with multiple zones, each with different power prescriptions. These lenses allow people to see clearly at **various distances** - up close for reading, mid-range for computer work, and far away for driving, without the hassle to switch between different pairs of glasses.
